LumberJack_Game   LumberJack_Game   LumberJack_Game

1. Introduction

Lumberjack is a game beyond ordinary games. In this game, by using blockchain technology and combining it with one of the most popular messengers in the world, we offer a different, innovative gaming experience, along with earning digital income. When you start the game, you will enter a world of trees, NFT, prop trading firm challenges and artificial intelligence.

2. What is LumberJack?

Lumberjack is a blockchain game built on the TON Chain and integrated with the Telegram social network to provide users with a different and easily accessible gaming experience without installing a special application.

This game is multi-faceted, we with creating an attractive gaming experience help to increase social interactions and expand a domestic economy that includes various sectors such as: Proprietary Trading firm (lumber prop) trading, lumber exchange, artificial intelligence assistant trade (lumber trader), NFT and Defi. For the internal economy of this game, a digital currency token called "Lumber" has been created using blockchain technology. Gamers can use the game character "Jack" to ax trees and collect tokens.

In addition to being the currency of the game, this token determines the value and league status of the users

Lumber is used in various parts of the domestic economy, for example, in Lumber Exchange it is used as a transaction fee, in AI Assistant trader as a currency for paying monthly subscriptions, in Prop Trading Firm as an entry fee to challenges.

The existence of three different leagues, each of which has special privileges and features such as staking, activation of NFT purchases, etc , makes gamers compete in different leagues from the moment they enter the game and gradually reach the top leagues.

We appreciate the gamers who have the most token holders or the most referrals in the game by giving them unique rewards and privileges such as monthly salaries, attractive Nfts, tokens for each referral, because they help to expand the Lumberjack ecosystem.

3. Lumber Jack Domestic Economy

To create an internal economy, functionalize the token and prevent the game token from decreasing value in various areas, including: building an artificial intelligence trading tool (Lumber Trader), building a lumber exchange with support for the most currency pairs in the market, a recruitment platform and providing capital We have entered for traders (Lumber Prop Firm).

The maximum supply of game tokens is limited to 10 billion, and cannot be increased or re-minted.

On the other hand, only 50% of the total token supply will be distributed among the gamers, the rest will be spent on various project goals according to the Tokenomic season.

At first, the game is single-player, and anyone can collect tokens by playing, after distributing 50% of the tokens among the gamers, the game is out of single-player mode and becomes a two-player game.

In the doubles game, gamers start competing with each other live, if either side of the game is a loser, the sum of the axes hit by the loser and the winner will be deducted from the loser gamer and the winner gamer will be rewarded.

It is quite natural that after changing the game from single to double, new gamers who enter the game should have at least 500 lumber in their wallet in order to be able to compete with their opponent.

A part of the tokens received from the gamers for charging the ax will be spent on advertising and community development of the game, and the rest will be burned.

The monthly subscription for Artificial intelligence trade assistant (Lumber Trader) will be received from users in the form of "Lumber" tokens, taking subscriptions in "Lumber" will reduce the amount of tokens in circulation between users, as well as 2% of the total monthly income. at Lumber AI Platform will be burned.

In Proprietary Trading firm (Lumber prop), before paying capital to traders, we put them in a two-stage challenge, entering this challenge involves paying a fee.

The cost of entering the challenge can be paid with the game token "Lumber" or its USDT equivalent.
If the trader succeeds in passing the challenge to receive capital, the cost of entering the challenge will be returned.

In the Lumberprop, 10% of the profits made by successful traders will be the share of propfirm.

It is quite clear that over time, providing capital for traders and sharing in their profits will bring amazing profits to the domestic economy of Lumberjack.
The generated profits will be used to pay programmers' salaries, rewards and game advertisements.

4. Lumber Exchange

One of the most important features of each token is its tradability, we have built a spot exchange with support for 2600 currency pairs to complete Lumberjack's internal economy chain.

In this exchange, the governance token of the game "Lumber" will be accepted as a fee from traders.

On the other hand, Lumber Exchange is a place to trade "Lumber" with other cryptocurrencies including USDT.
Of course, Lumber Exchange is not everything, the presence of our token in other reputable exchanges in the world is mandatory!!

The commission received from these transactions will be spent on advertising and keeping the game community active.

5. Lumber Prop Firm

What's prop firms?

Proprietary Trading Firms refer to platforms in the field of financial markets that allow traders to operate in the financial markets without risking their personal capital.

In fact, these companies provide traders with the necessary capital for trading. This not only reduces the personal financial risk for traders but also provides them with more opportunities for profit. In other words, in these platforms, after passing the challenges, traders get hired by the Prop Firm company and start trading and making profits with the company's capital. One of the most important points in Prop Firm is that 90% of the profits generated in Lumber Prop The form will be paid to the traders and the remaining 10% will be the prop firm share.

Before receiving capital from Lumber Prop, traders must participate in a two-stage challenge to measure their competence and knowledge. The first step: the trader must be able to earn a target profit of 8% within 30 days Second stage: The trader must be able to earn a target profit of 4% within 60 days In each of the steps, the daily drawdown ceiling is 5% and the maximum total loss is 12%.

Compliance with the rules is required to pass the challenge, that's why by using robots designed by programmers, all transactions are checked live so that rules such as Drawdown, etc. are not violated. Naturally, if the rules are violated, they will be removed from the challenge.

Each trader can receive capital from 5,000 to 200,000 dollars according to his chosen plan.

Profit withdrawal is available in USDT (TRC20) or Lumber token.

6. Referral and Reward

Referral

Gamers in any league and position can collect up tokens for each referral by sharing their referral link with their friends.

The payment of tokens per referral will continue until 50% of the tokens are distributed among users, after that token payments will stop for new referrals and if new referrals are added, only their number will be counted.
The top 60 people who have the highest number of referrals will enjoy amazing benefits .[1]

[1] It is fully explained in the Reward section.

Reward

Certainly, having an active and loyal community is one of the requirements for the success of any game, so the game creators have considered amazing bonuses and rewards for two groups of people to expand the community of active gamers in the game and consequently help the internal economy of the game:

The first group : people who have the highest referral rate:

Based on the classification of the top 60 people who have the most referrals, they are considered Community Leaders, Colliders and Elders, respectively, and will enjoy unique rights and benefits:

Community leader

The top 10 people who have the highest number of referrals are called community leaders. These people, who are often active influencers on Telegram, Twitter, Instagram, etc act as a link between the game creators and the community to keep them active and dynamic. Having a community will be used
In gratitude and keeping these people active, 50 million lumber will be distributed among the community leaders as a reward.
2% of the most valuable NFTs, equivalent to 10 NFTs, will be distributed among community leaders.

Community Co-leader

People who have been placed in the referral ranking between 11 and 30 will be included in this group.

the amount of 30 million lumber will be distributed among the users of this category.

1% of the most valuable NFT, which is equivalent to 5 NFTs, will be distributed among these users by lottery.

Community Elder

People who have a referral rating between 31 and 60 will be in this group.
Also, the amount of 10 million lumber jacks will be distributed among this group.

2% of the most valuable NFTs, equivalent to 10 Nft, will be distributed among the members of this group by lottery.

point: The list of people who are in different community leader categories is updated instantly in the robot and the site, but for Reward payment, a snapshot will be prepared at the end of each month and then the Reward will be paid. This means that Community leaders in different categories can compete for more salaries and benefits

The list of people who are in different ranks of top referral is updated instantly on the robot and site, snapshot will be prepared at the end of each month and then the Reward will be paid.

This means that top referrals in different categories can compete for more benefits with each other.

Rank	Token	NFT
1	100,000 Lumber	2
2	100,000 Lumber	2
3	100,000 Lumber	2
4	40,000 Lumber	1
5	40,000 Lumber	1
6	40,000 Lumber	1
7	20,000 Lumber	1
8-10	20,000 Lumber	1
11	20,000 Lumber	1
12	20,000 Lumber	1
13	20,000 Lumber	1
14	17,000 Lumber	1
15	17,000 Lumber	1
16	17,000 Lumber	1
17-30	13,000 Lumber	Random Draw
31	10,000 Lumber	Random Draw
32	10,000 Lumber	Random Draw
33	10,000 Lumber	Random Draw
34	8,000 Lumber	Random Draw
35	8,000 Lumber	Random Draw
36	8,000 Lumber	Random Draw
37-60	6,000 Lumber	Random Draw

Top Holder

People who hold the largest amount of tokens

The top 33 people who own the most number of Lumber jacks are placed in the second group, which are divided into King Lumber and Lord Lumber based on categories, and special points and prizes are also provided for the people of each category.

King Holder

The top 10 people who hold the largest amount of Lumber tokens are called King Lumber.

In the top holder as in the top referral, as a token of appreciation, for keeping Lumberjack active and dynamic, 20 million lumber will be divided among the members of this group 2% of all NFTs, equivalent to 10 of the best and most valuable NFTs, will be distributed among these users.

In order to prevent Top Referral and Top Holder from being the same, the tokens that are rewarded to users through referrals are not counted in Top Holder, only the tokens that the user earns through playing are counted for Top Holder ranking

Ran	Token	NFT
	King Holder	
1	30,000 Lumber	1
2	30,000 Lumber	1
3	30,000 Lumber	1
4	20,000 Lumber	1
5	20,000 Lumber	1
6	20,000 Lumber	1
7	12,000 Lumber	1
8	12,000 Lumber	1
9	12,000 Lumber	1
10	12,000 Lumber	1

Lord Lumber

The remaining 23 people from the total of 33 people in this group belong to the Lord Lumber category

3% of the total NFTs, equivalent to 15 of the best and most valuable NFTs, will be distributed among these users.

15 million Lumber will be distributed among the people of this group

7. NFT and Staking

NFT

Players of different leagues can access Lumberjack's exclusive and limited collection, which includes 500 special and unique NFTs.

During the game, each NFT has a special leverage, this leverage helps the gamer to collect more tokens than the normal mode every time they play.
Therefore, every gamer who purchases NFT and keeps his own game wallet, the amount of tokens he receives in each game is proportional to the purchased NFT and its coefficient will be calculated multiple times.

According to the internal economy of the game, the NFTs in the Lumberjack collection can be purchased on Getgems.io, the site and the robot with Lumber , TON , BNB and USDT

10% of the total number of NFTs will be distributed as a reward between the two groups of users who have the most referrals and the most amount of Lumberjack Hold.

Staking

After passing the Silver League, players can stake their tokens using a smart contract to earn more in weekly and monthly plans with various APRs until they reach the right amount to buy the NFT they want.

Staking Plans

	Amount	Duration	APR	
●	25000 LMBX	7 Days	2 %	Start
●	35000 LMBX	14 Days	4.25 %	Start
●	55000 LMBX	30 Days	10 %	Start
●	90000 LMBX	45 Days	18 %	Start
●	170000 LMBX	45 Days	22%	Start

9% of the total token supply is allocated for staking liquidity.

8. Game Play

In "Lumberjack", the game mechanism offers players a unique gaming experience with a combination of challenge, competition, and attractive features. Each hit earns one token. These tokens are used as currency units in the game and Jack's internal economy and have an economic value.

Ax Charge

After a certain number of hits, the ax must be recharged. The charging of the ax is done over time

League ranking

The ranking of people in each league is done based on the number of tokens in order from the most to the least. This ranking not only shows the honors of the players but also helps create more competition in the Lumberjack community.

Types of leagues:
Players participate in three different leagues:

Silver Lumbers
"Silver Lumbers" entry league is for new players. The league offers a friendly environment with plenty of opportunities to learn.

Master Lumbers
Players who reach 200,000 lumber points will be promoted to the "Master Lumbers" league. This league offers more features including NFT purchases and access to advanced challenges and tournaments, and staking. Players can challenge their skills in this league and advance to the next league.

Champion Lumbers
The "Champion Lumbers" league is designed for professional and top players, players who reach 500,000 points will be promoted to this league. The players of this league have special benefits,.
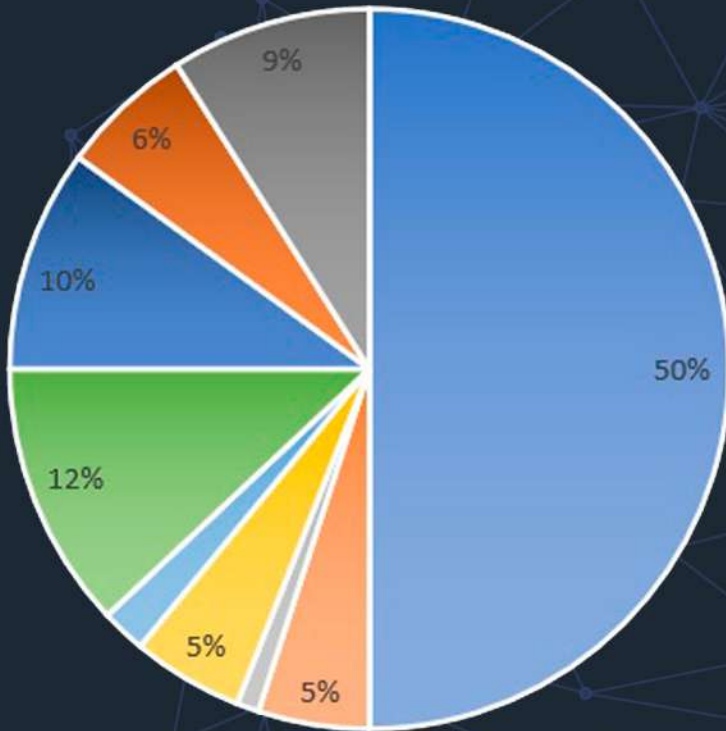

Slow Option
Players can purchase the Slow option by paying tokens. This option increases the Dead Line time and allows players more time to stay still. Each Slow purchase adds one second to the player, the maximum increase of Dead line is 12 seconds.
This option may not be very important for gamers at the beginning, when the game is played individually, but by changing the game from single to double and creating competition, it will be an important factor for gamers to win.

8. Lumber Tokenomics

Pie chart values: 50%, 9%, 6%, 10%, 12%, 5%, 5%

Legend:
- In Game Token Distribution
- Bonus to the most referral and holders
- Charity
- Liquidity for Propfirm and Market Making
- campaign
- Ads
- Founders
- Game Development

9. Road Map

Q2 2024
- The game starts
- We will pass one million active users and will be listed in a popular exchange
- 4 or 6 weeks after being listed, the Lumber Exchange mini-app will be launched on the Telegram social network

Q3 2024
- Launching artificial intelligence and Lumber trade assistant

Q4 2024
- After the launch of Lumber Exchange, the distribution of the main token among users will begin. Also, the game will change from single-player mode to a two-player game and competition.

Q1 2025
- Lumberjack NFT market launch with limited collection + Prop Firm will lounched
- Artificial intelligence trading assistant (Lumber Trader) is added to the exchange
